18 //更新方向:
19 //1.增加负数的识别与读取 (-a=(0-a))          fixed
20 //2.对于多余运算符的识别                      fixed
21 //3.对于输入非特定字母命令的识别              fixed
22 //4.对于负数开奇整数次方的支持
23 #include<why_calculator.h>
24
